SUMMARY

Computer Science Engineering student with hands-on experience in software development and AI/ML using Java, Python, React.js, Spring Boot, and PostgreSQL. Strong foundation in programming, databases, problem-solving, and developing and testing technical solutions.

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science Engineering **(2023-27)**
ABES Institute of Technology (ABESIT), Ghaziabad | CGPA : 8.2
Class XII (CBSE) - S.S. Children Academy Girls School | Percentage: 81.4%
Class X (CBSE) - S.S. Children Academy Girls School | Percentage: 92.6%

PROFESSIONAL SKILLS

- Communication
- Teamwork
- Problem Solving
- Leadership
- Adaptability
- Willingness to Learn

SKILLS

- **Programming:** Java, JavaScript, TypeScript, Python, SQL
- **Core Concepts:** OOP, DSA, DBMS, REST APIs
- **Development:** React.js, Spring Boot, Node.js, HTML5, CSS3
- **Databases:** PostgreSQL, MySQL
- **AI/ML:** PyTorch, Deep Learning, NLP, Computer Vision, OpenCV
- **Tools:** Git, GitHub, Postman

PROJECTS

- **Pragati - AI - Powered Rural Governance Platform**
  (Tech Stack : React.js, Python, Spring Boot, Postman, PostgreSQL, NLP, OpenCV)
  - Built an AI-powered full-stack governance platform for fund transparency, grievance management, and citizen–Panchayat interaction.
  - Integrated Python-based sentiment analysis, complaint clustering, anomaly detection, and multi-level authentication.
  - Developed and tested application workflows using REST APIs, Postman, and PostgreSQL for reliable data management.
- **Smart-Spend-AI**
  (Tech Stack : React.js, React Native, TypeScript, Python, Rest APIs, Spring Boot, PostgreSQL, Gemini AI)
  - Developed a full-stack expense management application for tracking income, expenses, budgets, and category-wise spending.
  - Integrated Python-based AI/ML for spending pattern analysis, smart categorization, budget alerts, and personalized recommendations.
  - Built backend workflows using Spring Boot and PostgreSQL for application data processing and management.
- **Breast Cancer Detection System**
  (Tech Stack : Python, PyTorch, ResNet50, OpenCV)
  - Developed a Python-based deep learning system to classify mammography images as benign or malignant using the CBIS-DDSM dataset and ResNet50.
  - Built an automated image preprocessing and lesion ROI pipeline using OpenCV and Albumentations.
  - Implemented Grad-CAM for model explainability and evaluated performance using Accuracy, Precision, Recall, F1-Score, and ROC-AUC.

CERTIFICATIONS & ACHIEVEMENTS

- Java Developer Certification – **Infosys**, February 2026
- Programming using Java – **Infosys**, June 2025
- Advanced Software Engineering Job Simulation – **Walmart**, March 2026
- Front-End Software Engineering Job Simulation – **Skyscanner**, March 2026
- Top 10 Team – **Hacknovate 7.0**, Inter-College Hackathon
